

**MASTER OF INFORMATION TECHNOLOGY
(MIT) - Information and Communication
Technologies for Sustainable Development**

COURSE BROCHURE

Master of Information Technology (MIT)

(Information and Communication Technologies for Sustainable Development)

The Cyryx College Master of Information Technology (MIT) is designed to provide students with advanced technical skills and knowledge to become leaders of information technology innovation. It is designed for informational technology professionals looking to update and extend their technical knowledge of advanced computing subjects, or move into a new specialization. This programme offers students the opportunity to specialize in big data and data science, innovation and technology management, or information and communication technologies for sustainable development.

As the world gears up to deliver on the United Nation's Sustainable Developments Goals, governments and international development organizations need technology leaders who can effectively design, deploy, and manage technology for sustainable development initiatives. The MIT in Information and Communication Technologies for

Sustainable Development aims to develop information and communications technology for development (ICT4SD) champions ready to lead innovation and technology projects in the public service and national and international development sectors.
